Reach, RoHS and Prop 65 Compliance

GSI is a custom, per print manufacturer. We use the materials chosen by our customers and do not have any roll in choosing the viability or conformity of the materials for the end use intended by our customers. As such we have no way to verify the compliance of the finished product to either Reach or RoHS directives. However, we are happy to assist in obtaining SDS documents and or Reach compliance documents from the chosen material manufacturer if you so require.

During our manufacturing process we do not intentionally add any banned substances such as lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB) or polybrominated diphenyl ether (PBDE), as well as designated phthalates plasticizers.

Some materials chosen by our customers may contain a listed chemical known to the state of California to cause cancer and/or birth defects or reproductive harm. For more information, please go to WWW.P65Warnings.ca.gov. GSI will provide a general warning that the product purchased may contain chemicals known to the State of California to cause cancer and or birth defects and effect reproductive health. It is the customer's responsibility to determine if a more detailed warning is required for their distribution of parts. Again, we are happy to assist in obtaining information to help you make that determination.

Sincerely,

Stephen A. Haight
